

## Class Link/Student Grade Portal Instructions

1. Students must make up passwords AT SCHOOL! They may get their initial passwords from their teachers or their media center staff. They must have these initial passwords to make up their new ones. Students must use school computers to create these new passwords.
2. From home, students and parents need to click on the Class Link button on the Sims Middle homepage ([sismiddle.weebly.com](http://sismiddle.weebly.com))
3. When the password script pops up, enter this info:  
**Username:** student number (starts with 57...) You do not need to enter anything after your student number!  
**Password:** school computer password
4. Another password script box may pop up to verify your password. This is still the student's school computer password.
5. **Grades are located under Student/Parent Portal.**
6. You may also notice that there are several other useful apps (sites) for students such as history, math, and English textbooks.

At this time, the app for smartphones is not working correctly and is not recommended. Also, many students have had issues with their smart phones and getting to Class Link. If that's the case for you, try a computer instead.
