

SAC Budget Requests for Summer 2018
to be used to prepare for 2018-2019 School Year

- \$3,000 – To pay teacher stipends for summer work days:
 - Social Studies - 8 teachers; 1 day to work together to create learning goals and scales for next year's lessons.
 - Science – 10 teachers; 1 day to work in grade level pairs to review new textbook and new course materials.
 - Reading Support in Content classes – 6 teachers; 1 day to review student data and create lessons and activities to support our Reading Intervention in content classes.
- \$2,000 – For preplanning week, professional development materials including but not limited to books, incentives, supplies, and food to support trainings and activities during the week of preplanning.
- \$1,000 – For 20th Anniversary promotional items including but not limited to custom folders, pencils, pens, and other items to give to students and staff in celebration of this milestone as part of our PBS program.
- \$500 – To purchase a class set of Math FSA Coach Workbooks for 8th grade Pre-Algebra. (They are not asking each student to purchase their own but are going back to a class set of materials as they feel this approach saves families money and is just as effective a teaching and learning tool.)
- \$200 – Summer SAC School Improvement Plan (SIP) input meeting materials including but not limited to custom folders, pencils, pens and food to support trainings and discussion session.
